Zoltán Szabó

Zoltán Szabó
Professor of Data Science

(Last updated: 16th September, 2021)

Contact Information

Department of Statistics
London School of Economics and Political Science (LSE)
Houghton Street
London, WC2A 2AE
UK

Web: `https://zoltansz.github.io/`
E-mail: `x@y` [`x` = z.szabo, `y` = lse.ac.uk]

Research Interest

- Theory: statistical machine learning; information theory[1], kernel methods, scalable computation.
- Applications:
  - shape-constrained prediction, hypothesis testing, safety-critical learning, style transfer, distribution regression, dictionary learning, structured sparsity, independent subspace analysis, bioinformatics, Bayesian inference, computer vision,
  - finance, economics, analysis of climate data, criminal data analysis, collaborative filtering, emotion recognition, face tracking, remote sensing, natural language processing, gene analysis.

Employment

London School of Economics and Political Science, United Kingdom
Department of Statistics
Professor of Data Science — 2021–

École Polytechnique, France
Center of Applied Mathematics
Senior Researcher (1st class, HDR) — 2019–2021
Senior Researcher (1st class) — 2016–2019

University College London, United Kingdom
Gatsby Unit
Research Associate (with Prof. Arthur Gretton) — 2013–2016

Eötvös Loránd University, Hungary
School of Computer Science
Research Fellow — 2009–2013
Assistant Research Fellow — 2008–2009
Assistant Professor — 2007–2008

Habilitation and Education

Paris-Sud University, France
HDR (with distinction) — 2019
Title: Contributions to Kernel Techniques.

Eötvös Loránd University, Hungary
School of Computer Science
Ph.D. (summa cum laude) — 2004–2007
Title: Separation Principles in Independent Process Analysis.
Faculty of Natural Sciences, Applied Mathematics
Ph.D. (summa cum laude) — 2003–2006
Title: Group-Structured and Independent Subspace Based Dictionary Learning.

[1] Information Theoretical Estimators (ITE) Toolbox: `https://bitbucket.org/szzoli/ite-in-python/`.

M.Sc. (with distinction) 1998–2003
Title: Retina Based Sampling in Face Component Recognition.
Specialization in Systems Theory, Signal and Image Processing, Financial and Actuarial Mathematics.

Professional Activities

Moderator of
Statistical Machine Learning (stat.ML) on arXiv 2018–

Reviewing Grant Applications
Israel Science Foundation (ISF) 2021–
European Research Council (ERC) 2018–
Swiss National Science Foundation (SNSF) 2017–

Senior Area Chair (SAC)
Advances in Neural Information Processing Systems (NeurIPS) 2019

Area Chair (AC)
International Conference on Artificial Intelligence and Statistics (AISTATS) 2022
International Conference on Learning Representations (ICLR-2022) 2021
Advances in Neural Information Processing Systems (NeurIPS) 2021
International Conference on Machine Learning (ICML) 2021
Conference on Learning Theory (COLT) 2021
Conference on Uncertainty in Artificial Intelligence (UAI) 2021
International Joint Conference on Artificial Intelligence (IJCAI) 2021
International Conference on Artificial Intelligence and Statistics (AISTATS) 2021
International Conference on Learning Representations (ICLR-2021) 2020
Advances in Neural Information Processing Systems (NeurIPS) 2020
Conference on Uncertainty in Artificial Intelligence (UAI) 2020
International Conference on Machine Learning (ICML) 2020
International Joint Conference on Artificial Intelligence (IJCAI) 2020
International Conference on Artificial Intelligence and Statistics (AISTATS) 2020
International Joint Conference on Artificial Intelligence (IJCAI) 2019
International Conference on Machine Learning (ICML) 2019
International Conference on Artificial Intelligence and Statistics (AISTATS) 2019
Advances in Neural Information Processing Systems (NeurIPS) 2018
International Conference on Machine Learning (ICML) 2018
International Conference on Artificial Intelligence and Statistics (AISTATS) 2018
Conference on Uncertainty in Artificial Intelligence (UAI) 2017
International Conference on Machine Learning (ICML) 2017
International Conference on Artificial Intelligence and Statistics (AISTATS) 2017
Conference on Uncertainty in Artificial Intelligence (UAI) 2016

Management Committee
DSI Management Committee (LSE) 2021–

Advisory Committee
arXiv Statistics Advisory Committee Member 2019–

Program Chair @ Data Science Summer School[2]
co-organizers: Aldjia Mazari, Bertrand Thirion, Emmanuel Gobet, Erwan Le Pennec, Jasmyn Scaramella. 2020
co-organizers: Aldjia Mazari, Anastasiia Nitavskyi, Aurélie Coen, Bertrand Thirion, 2019

[2]Web: `http://www.ds3-datascience-polytechnique.fr/`.

	Charlotte Renauld, Elena Carvajal, Emmanuel Bacry.	
co-organizers:	Aldjia Mazari, Charlotte Renauld, Emmanuel Bacry, Erwan Scornet, Maud Cadiz-Pena, Nozha Boujemaa, Viviane Hoang.	2018
co-organizers:	Aldjia Mazari, Emmanuel Bacry, Éric Moulines, Erwan Scornet.	2017

Editorial Board Member

Journal of Machine Learning Research	2020–

Associate Editor

Mathematical Foundations of Computing	2019–

Reviewing for Journals

Annals of Applied Probability	2021–
Journal of the American Statistical Association	2021–
Information and Inference: A Journal of the IMA	2020–
Nature Machine Intelligence	2020–
Transactions on Knowledge and Data Engineering	2020–
Foundations of Data Science	2019–
Foundations of Computational Mathematics	2019–
Electronic Journal of Statistics	2019–
Journal of Multivariate Analysis	2017–
Annals of Statistics	2016–
Machine Learning	2016–
Statistics and Computing	2015–
IEEE Signal Processing Letters	2015–
Statistical Analysis and Data Mining	2014–
IET Computer Vision	2014–
International Journal of Computer Vision	2014–
IEEE Transactions on Information Theory	2013–
Journal of Machine Learning Research	2013–2019
IEEE Transactions on Pattern Analysis and Machine Intelligence	2013–
Progress in Artificial Intelligence	2013–
Entropy	2012–
IEEE Transactions on Neural Networks and Learning Systems	2012–
Signal, Image and Video Processing	2012–
IEEE Transactions on Signal Processing	2009–
Neurocomputing	2009–
IEEE Transactions on Neural Networks	2007–2011

Reviewing Books

Cambridge University Press	2018–

Reviewing for Conferences

IEEE International Symposium on Information Theory (ISIT)	2021
International Conference on Artificial Neural Networks (ICANN)	2019
International Conference on Learning Representations (ICLR-2019)	2018
Conference on Learning Theory (COLT)	2018
International Conference on Learning Representations (ICLR-2018)	2017
Conference on Learning Theory (COLT)	2017
Advances in Neural Information Processing Systems (NIPS)	2017
Advances in Neural Information Processing Systems (NIPS)	2016
International Conference on Machine Learning (ICML)	2016
Advances in Neural Information Processing Systems (NIPS)	2015
Advances in Neural Information Processing Systems (NIPS)	2014
International Conference on Machine Learning (ICML)	2012

International Conference on Latent Variable Analysis and Signal Separation (LVA/ICA) 2012
International Joint Conference on Artificial Intelligence (IJCAI) 2011
International Joint Conference on Neural Networks (IJCNN) 2011
European Conference on Complex Systems (ECCS) 2011
European Signal Processing Conference (EUSIPCO) 2011
European Conference on Complex Systems (ECCS) 2009

Reviewing Workshop Proposals
International Conference on Machine Learning (ICML) Workshops 2019

Reviewing for Workshops
Signal Processing with Adaptive Sparse Structured Representations (SPARS) 2019
Challenges in Machine Learning (CiML) @ N(eur)IPS:
Machine Learning Competitions "in the Wild": Playing in the Real World or in Real Time 2018
Gaming and Education 2016

Organizing (seminar)
Data Science Seminars @ Department of Statistics, LSE 2021–
Statistics Seminars (CREST-CMAP) 2020–2021
co-organizers: Cristina Butucea, Alexandre Tsybakov, Karim Lounici.
Machine Learning External Seminars @ CMAP, École Polytechnique 2017–2021
Machine Learning External Seminars @ Gatsby Unit, University College London 2014–2016

Organizing (workshop, conference)
Kernel Methods for Structured Data and Distributions @ DALI 2022
– co-organizer: Alessandro Rudi
StressTest-2020 workshop Nov. 30–Dec. 1, 2020
– co-organizers: Stefano De Marco, Emmanuel Gobet.
– topics: financial stress-testing, uncertainty quantification, risk and dependence modelling.
NIPS: 'Learning on Distributions, Functions, Graphs and Groups' 2017
– co-organizers: Bharath K. Sriperumbudur, Florence d'Alché-Buc, Krikamol Muandet.
NIPS: 'Adaptive and Scalable Nonparametric Methods in Machine Learning' 2016
– co-organizers: Aaditya Ramdas, Bharath K. Sriperumbudur, Han Liu, John Lafferty, Mladen Kolar, Samory Kpotufe.
NIPS: 'Modern Nonparametrics 3: Automating the Learning Pipeline' 2014
– co-organizers: Andrew G. Wilson, Arthur Gretton, Eric Xing, Han Liu, Le Song, Mladen Kolar, Samory Kpotufe.
Conference (Workflow Chair)
International Conference on Artificial Intelligence and Statistics (AISTATS) 2016
– co-workflow chair: Rodolphe Jenatton.

Organizing (journal club, group meeting)
SIMPAS Group Meeting @ CMAP, École Polytechnique 2020–2021
– co-organizers: Aymeric Dieuleveut, Emmanuel Gobet, Erwan Le Pennec.
Machine Learning Journal Club @ CMAP, École Polytechnique 2017–2021

Session Chair
International Conference on Machine Learning (ICML) 2021
Sessions: Kernel Methods, Learning Theory.
Conference on Uncertainty in Artificial Intelligence (UAI) 2020
Session: Optimization.
International Conference on Mathematics of Data Science (MathoDS 3) 2019
International Conference on Machine Learning (ICML) 2018

Session: Statistical Learning Theory.
Paris Summit on Big Data (ParisBD) 2017

Mentoring Newcomers
3 Newcomers @ ICML 2020

Mentoring Oral Presentations
Rahul Singh (MIT Economics) @ NeurIPS 2019

Reviewing Scientific Competitions
National Scientific Student Competition and Conference 2005, 2013
Scientific Student Competition and Conference 2012

Publications

Preprints

[1] Alex Lambert†, Sanjeel Parekh†, Zoltán Szabó, and Florence d'Alché-Buc. Emotion transfer using vector-valued infinite task learning. Technical report, 2021. (†contributed equally; `https://arxiv.org/abs/2102.05075`).

Invited Talks & Posters

[1] Vector-valued infinite task learning in style transfer. CMStatistics, Advanced Statistical Methods for High Dimensional Data, presentation (25 minutes), 18-20 December 2021.

[2] Distribution regression and beyond. LSE Statistics Open House, presentation (20 minutes), 14 October 2021.

[3] Applications of kernel-based information theoretical measures. LSE Statistics Open House, presentation (15 minutes), 14 October 2021.

[4] Kernel regression with hard shape constraints. Workshop on Advances in Convex Optimization (EUROPT), presentation (25 minutes), 8 July 2021.

[5] Vector-valued prediction with RKHSs and hard shape constraints. Computer Science and Systems Laboratory, Aix-Marseille University, presentation (1 hour), 20 May 2021.

[6] Information theory, kernels and applications. Department of Statistics, LSE, presentation (50 minutes), 4 March 2021.

[7] Shape-constrained kernel machines. Department of Statistics, Texas A&M University, presentation (1 hour), 12 February 2021.

[8] Kernel machines with hard shape constraints. Meeting on Mathematical Statistics (MMS): Robustness and Computational Efficiency of Algorithms in Statistical Learning, presentation (40 minutes), 15 December 2020.

[9] Kernel information theory and finance. D. E. Shaw Group, New York, U.S., presentation (30 minutes), 21 January 2020.

[10] Towards large-scale approximation of tasks with derivatives – a kernel perspective. International Conference on Modern Mathematical Methods and High Performance Computing in Science & Technology (M3HPCST), Ghaziabad, India, presentation (30 minutes), 9-11 January 2020.

[11] Orlicz Fourier features. International Indian Statistical Association Conference (IISA), IIT Bombay, India, presentation (20 minutes), 26-30 December 2019.

[12] Consistency of Orlicz random Fourier features. EPFL, presentation (45 minutes), 23 September 2019.

[13] Orlicz random Fourier features. Gatsby 21st Birthday Symposium, London, UK, presentation (20 minutes), 11-13 July 2019.

[14] Outlier-robust divergence estimation on kernel-endowed domains with median of means. Third International Conference on Mathematics of Data Science (MathoDS 3), City University of Hong Kong (CityU), Hong Kong, China, presentation (30 minutes), 19-23 June 2019.

[15] Towards outlier-robust statistical inference on kernel-enriched domains. RIKEN AIP Workshop, Tokyo, Japan, presentation (30 minutes), 15 April 2019.

[16] From distance covariance to Hilbert-Schmidt independence criterion. Statistical Seminar in Rennes, presentation (1 hour), 26 October 2018.

[17] HSIC, a measure of independence? Laboratory for Information and Inference Systems (LIONS), EPFL, presentation (40 minutes), 28 February 2018.

[18] HSIC, an independence measure? Machine Learning & Computational Biology Lab, Department of Biosystems Science and Engineering (D-BSSE), ETH Zürich, presentation (1 hour), 26 February 2018.

[19] Linear-time divergence measures with applications in hypothesis testing. Tao Seminar, INRIA Saclay, presentation (45 minutes), 13 February 2018.

[20] Characterizing independence with tensor product kernels. Department of Statistics, Pennsylvania State University, presentation (1 hour), 13 December 2017.

[21] Tensor product kernels: Independence and beyond. Google Brain, Mountain View, presentation (1 hour), 1 December 2017.

[22] Tensor product kernels: Characteristic property and beyond. Advanced Methods Group, Cubist Systematic Strategies, New York, presentation (90 minutes), 28 November 2017.

[23] Independence with tensor product kernels. Yahoo Research, New York, presentation (1 hour), 28 November 2017.

[24] Tensor product kernels: Characteristic property and universality. Research Seminar, SfS, ETH Zürich, presentation (45 minutes), 3 November 2017.

[25] Characteristic tensor kernels. CREST Statistics Seminar, ENSAE, presentation (75 minutes), 9 October 2017.

[26] Data-efficient independence testing with analytic kernel embeddings. PASADENA Seminar, Télécom ParisTech, presentation (1 hour), 17 May 2017.

[27] Distribution regression: A simple technique with minimax-optimal guarantee. Parisian Statistics Seminar, Henri Poincaré Institute, presentation (1 hour), 27 March 2017.

[28] A linear-time adaptive nonparametric two-sample test. Signal Processing and Machine Learning Seminar, Marseilles, presentation (1 hour), 24 March 2017.

[29] Minimax-optimal distribution regression. Probability and Statistics Seminar, Orsay, presentation (1 hour), 16 March 2017.

[30] T-testing: A linear-time adaptive nonparametric technique. Machine Learning Seminar, Télécom ParisTech, presentation (1 hour), 2 February 2017.

[31] Distribution regression. New Directions for Learning with Kernels and Gaussian Processes Dagstuhl Seminar, presentation (30 minutes), 1 December 2016.

[32] Adaptive linear-time nonparametric t-test. Facebook AI Research, Paris, France, presentation (45 minutes), 21 November 2016.

[33] Distinguishing distributions with maximum testing power. Realeyes, Budapest, Hungary, presentation (1 hour), 24 August 2016.

[34] Optimal regression on sets. eResearch Domain launch event, London, UK, poster, 29 June 2016.

[35] Hypothesis testing with kernels. International Workshop on Pattern Recognition in Neuroimaging (PRNI), Trento, Italy, presentation (1 hour), 22-24 June 2016.

[36] Kernel-based learning on probability distributions. University of California, San Diego, presentation (30 minutes), 25 April 2016.

[37] Distribution regression with minimax-optimal guarantee. MASCOT-NUM, presentation (45 minutes), 25 March 2016.

[38] Performance guarantees for kernel-based learning on probability distributions. Special Symposium on Intelligent Systems, MPI, Tübingen, presentation (20 minutes), 16 March 2016.

[39] Optimal rates for the random Fourier feature technique. École Polytechnique, presentation (2 hours), 14 March 2016.

[40] Learning theory for vector-valued distribution regression. CMStatistics 2015, presentation (35 minutes), 12 December 2015.

[41] Optimal uniform and L^p rates for random Fourier features. Pennsylvania State University, presentation (1 hour), 4 December 2015.

[42] Optimal rates for the random Fourier feature method. Statistical ML Reading Group, Carnegie Mellon University, presentation (1 hour), 1 December 2015.

[43] Distribution regression: Computational and statistical tradeoffs. ML Lunch Seminar, Carnegie Mellon University, presentation (50 minutes), 30 November 2015.

[44] Distribution regression: Computational and statistical tradeoffs. Princeton University, presentation (1 hour), 26 November 2015.

[45] Optimal rates for random Fourier feature approximations. University of Alberta, presentation (1 hour), 24 November 2015.

[46] Optimal rates for random Fourier feature kernel approximations. AMPLab, UC Berkeley, presentation (1 hour), 20 November 2015.

[47] Performance guarantees for random Fourier features - limitations and merits. Neil Lawrence's lab, University of Sheffield, presentation (1 hour), 25 June 2015.

[48] Regression on probability measures: A simple and consistent algorithm. Centre for Research in Statistical Methodology Seminars, Department of Statistics, University of Warwick, presentation (1 hour), 29 May 2015.

[49] Vector-valued distribution regression - keep it simple and consistent. Computational Statistics and Machine Learning reading group, Department of Statistics, University of Oxford, presentation (50 minutes), 1 May 2015.

[50] A simple and consistent technique for vector-valued distribution regression. Artificial Intelligence and Natural Computation seminars, University of Birmingham, presentation (50 minutes), 26 January 2015.

[51] Consistent vector-valued regression on probability measures. Bernhard Schölkopf's Lab, MPI for Intelligent Systems, Tübingen, presentation (1 hour), 15 January 2015.

[52] Vector-valued distribution regression: A simple and consistent approach. Statistical Science Seminars, UCL, presentation (1 hour), 9 October 2014.

[53] Distribution regression - the set kernel heuristic is consistent. CSML Lunch Talk Series, UCL, presentation (1 hour), 2 May 2014.

[54] Consistent distribution regression via mean embedding. University of Hertfordshire, presentation (1 hour), 5 March 2014.

[55] Dictionary learning: Independence, structured sparsity and beyond. Gatsby Unit, UCL, presentation (45 minutes), 23 April 2013.

[56] Dictionary optimization problems and their applications. Eötvös Loránd University, Day of Science, presentation (40 minutes), 22 November 2012.

[57] Recommender systems, applications in education. Child's Play with Adult's Mind, Conference, Budapest University of Technology and Economics, presentation (20 minutes), 22 March 2012.

[58] Collaborative filtering via group-structured dictionary learning. Eötvös Loránd University, Innovation Day, poster, 23 February 2012.

[59] Beyond independent subspace analysis. INRIA, SIERRA project-team, presentation (90 minutes), 17 January 2012.

[60] Hedging with Lasso. Morgan Stanley, presentation (25 minutes), 9 September 2011.

[61] Interpreting natural language: applications of group-structured dictionary learning. Eötvös Loránd University, Faculty of Informatics, Neumann's Day, poster, 12 May 2011.

[62] Interpreting words: an application of (structured) sparse coding. Eötvös Loránd University, Faculty of Informatics, Neumann's Day, poster, 12 May 2011.

[63] Online group-structured dictionary learning. Eötvös Loránd University, Faculty of Informatics, Neumann's Day, poster, 12 May 2011.

[64] Structured sparsity and non-convex sparsity-inducing methods. Morgan Stanley, presentation (25 minutes), 9 May 2011.

[65] Online group-structured dictionary learning. Eötvös Loránd University, TÁMOP Research Seminar, presentation (45 minutes), 28 January 2011.

[66] Online group-structured dictionary learning. Machine Learning at Budapest, presentation (45 minutes), 22 November 2010.

[68] Nonparametric regression, Lasso. Eötvös Loránd University, Problem Solving Seminar for Applied Mathematicians, presentation (45 minutes), 12 November 2009.

[69] Analysis and prediction of time series with missing data. Morgan Stanley, Speaker Series Event, presentation (30 minutes), 9 October 2009.

[70] Analysis and prediction of time series with missing data. Morgan Stanley - BME Financial Innovation Centre Kick-off & Workshop, presentation (25 minutes), 15 June 2009.

[71] Independent subspace analysis; tensor-SVD, tensorfaces; blind subspace deconvolution. Eötvös Loránd University, Problem Solving Seminar for Applied Mathematicians, presentation (45 minutes), 19 October 2007.

[72] Exploration of behavioral patterns and its applications in human-computer interaction. Info Savaria, Szombathely, presentation (30 minutes), 14-16 April 2005.

[73] Recognition of behavioral patterns and its potentials of human-computer interaction. Info ÉRA, Békéscsaba, presentation (30 minutes), 14-16 April 2004.

[74] Adaptive human-computer interaction via face and gaze tracking. Eötvös Loránd University, Faculty of Informatics, Neumann's Day, presentation (20 minutes), 6 November 2003.

Software

`http://www.cmap.polytechnique.fr/~zoltan.szabo/software.html`

Lecturing (**g**–graduate, **u**–undergradute)

LSE (UK)

Artificial Intelligence (**g**) — Autumn, 2021
- practical sessions: Dr. Marcos Barreto and a GTA

École Polytechnique (France)

Independence Measures and Testing (**g**) — Spring, 2021
- mini-course (4 hours).

Structured Data: Learning, Prediction, Dependency, Testing (**g**, M2 MDA) — Spring, 2019
- ca. 60 students,
- with Prof. Florence d'Alché-Buc, Prof. Slim Essid.

Advanced Machine Learning (**g**, X-HEC) — Spring, 2019
- ca. 60 students,
- with Prof. Stéphane Canu, Prof. Erwan Le Pennec, Thomas Kerdeux,
- tutoring: Jaouad Mourtada, Nicolas Prost.

Statistics (**g**, X-HEC) — Fall, 2018
- ca. 60 students,
- with Prof. Stéphanie Allassoniére, Prof. Elodie Vernet, Geneviéve Robin, Wei Jiang.

Introduction to Machine Learning (**g**, X-HEC) — Fall, 2018
- ca. 60 students,
- with Prof. Julie Josse, Prof. Erwan Scornet, Prof. Sylvain Le Corff, Florian Bourgey.

Structured Data: Learning, Prediction, Dependency, Testing (**g**, M2 MDA) — Spring, 2018
- ca. 70 students,
- with Prof. Florence d'Alché-Buc, Prof. Slim Essid, Prof. Arthur Tenenhaus, Alexandre Garcia (Datalab).

Advanced Machine Learning (**g**, X-HEC) — Spring, 2018

– ca. 60 students,
– with Prof. Stéphane Canu, Prof. Erwan Le Pennec, Anne Auger.

Structured Data: Learning, Prediction, Dependency, Testing (**g**, M2 MDA) — Spring, 2017
– ca. 95 students,
– with Prof. Florence d'Alché-Buc, Prof. Slim Essid, Prof. Arthur Tenenhaus.

Functional Data Analysis (**g**) — Fall, 2016
– special course.

INRIA (France)

Kernel Methods, Divergence and Independence Measures, Hypothesis Testing (**g**) — July 15–17, 2019
– @ Summer School on Data Science for Document Analysis and Understanding, — July 18 & 20, 2018
– 6-hour long course / year.

Manifold Learning and Classification for EEG Analysis (**g**) — July 27, 2017
– @ Summer School on Mathematical and Computational Methods, for Life Sciences,
– 3-hour long course.

HEC Paris (France)

Data for Management Certificate (**g**) — May 7 & 10, 2019
– with Prof. Karim Lounici, Prof. Sylvain Le Corff,
– 8 hours / day.

Carnegie Mellon University (US)

Kernel-based Dependency Measures and Hypothesis Testing (**g**) — Nov. 27, 2017
– Guest Lecture @ School of Computer Science,
– 80 minutes.

University College London (UK)

Advanced Topics in Machine Learning - Theory of RKHS (**g**) — Spring, 2015–2016
– ca. 60 students,
– with Prof. Arthur Gretton, Kacper Chwialkowski.

Adaptive Modelling, Introduction to Kernel Methods (**g**) — Spring, 2015–2016
– ca. 20 students,
– with Prof. Arthur Gretton, Heiko Strathmann, Wittawat Jitkrittum.

Eötvös Loránd University (Hungary)

Reinforcement Learning (**g**) — Spring, 2009–2013
– ca. 45 students in each semester,
– with Prof. András Lőrincz.

Artificial Neural Networks (**g**) — Fall, 2008–2012
– ca. 45 students in each semester,
– with Prof. András Lőrincz.

Image Processing, Speech Recognition, Applications of Artificial Intelligence (**g**) — 2007–2008
– ca. 25 students in each semester.

Introduction to Mathematics (**u**) — 2006–2007
– ca. 25 students in each semester.

Symbolic Programming (**u**) — 2004–2006
– ca. 25 students in each semester.

Student Supervision & Mentoring

Supervision

Linda Chamakh (Ph.D.) — Apr., 2018 – May, 2021
– CMAP, École Polytechnique & BNP Paribas, France,

– co-supervised with Prof. Emmanuel Gobet, Jean-Philippe Lemor,
– topic: Uncertainty Quantification, Robustness of Systematic Strategies.

Alex Lambert (Ph.D.) Oct., 2017 – May, 2021
– CMAP, École Polytechnique & LTCI, Télécom ParisTech, France,
– co-supervised with Prof. Florence d'Alché-Buc,
– topic: Statistical Learning of Vector-Valued Functions with Operator Random Fourier Features.

Gaspar Massiot (PostDoc) Oct., 2017 – Aug., 2018
– French Aerospace Lab ONERA, France,
– co-supervised with Prof. Éric Moulines, Sidonie Lefebvre,
– topic: Kernel Methods in Hyperspectral Imaging.

Romain Brault (PostDoc) Oct., 2017 – Oct., 2018
– CMAP, École Polytechnique & LTCI, Télécom ParisTech, France,
– co-supervised with Prof. Florence d'Alché-Buc, Prof. Arthur Tenenhaus,
– topic: Prediction of Functional Outputs by Kernels.

Zoltán Milacski (M.Sc.) 2012–2013
– School of Computer Science, Eötvös Loránd University (ELU), Hungary,
– co-supervised with Prof. András Lőrincz of the national student competitor (2nd prize),
– topic: Recurrent Reinforcement Learning in High-Frequency Algorithmic Trading.

Gabriella Merész (M.Sc.) 2012
– Department of Applied Mathematics, ELU, Hungary,
– topic: Prediction of Financial Time Series via ARMA-GARCH Methods.

Mentoring

Bechir Trabelsi (M.Sc. intern) May – Aug., 2020
– ESTA, France,
– topic: Shape-Constrained Risk Measures

Michaël Allouche (M.Sc. intern) Oct., 2019 – Jan., 2020
– École Polytechnique, France,
– co-supervised with Prof. Emmanuel Gobet,
– topic: Structured Dictionary Learning of Migration Matrices, GANs on Time Series

Meyer Scetbon (M.Sc. intern) Apr. – Sept., 2018
– INRIA, France,
– co-supervised with Gaël Varoquaux,
– topic: Fast Kernel-based Hypothesis Testing.

Roulier Lorraine, Flore Martin (M.Sc.) Jan. – Mar., 2018
– Sciences for Environmental Challenges, École Polytechnique, France,
– topic: Low-Dimensional Embedding of Environmental Variables.

Moussab Djerrab (Ph.D.) Fall, 2017
– LTCI, Télécom ParisTech, France,
– topic: Structured Prediction with Surrogate Losses.

Wittawat Jitkrittum (Ph.D.) 2013–2016
– Gatsby Unit, University College London, UK,
– topic: Kernel Techniques, Statistics.

Máté Csákvári, Zoltán Tősér (M.Sc.) 2012–2013
– School of Computer Science, ELU, Hungary,
– topic: Information Theory, Dictionary Learning.

László Jeni (PostDoc) 2011–2013
– Robotics Institute, Carnegie Mellon University, US,
– topic: Extensions of Constrained Local Models, Facial Expression Recognition.

Balázs Pintér, Gyula Vörös (Ph.D.) 2011–2013

– School of Computer Science, ELU, Hungary,
– topic: Structured-Sparse Coding and Dictionary Learning in Natural Language Processing.

András Sárkány (M.Sc.) 2011–2013
– School of Computer Science, ELU, Hungary,
– topic: Hedging via Sparse Coding.

Gergő Hammer (M.Sc.) 2011 Autumn – 2012 Spring
– Department of Applied Mathematics, ELU, Hungary,
– topic: Self-Similar Structures for Financial Prediction.

Mária Mészáros, Dávid Retek (M.Sc.) 2009 Autumn – 2010 Spring
– Department of Applied Mathematics, ELU, Hungary,
– topic: Online Structured Dictionary Learning and Its Applications.

Kitti Korbács, Nóra Villányi, Gabriella Merész (M.Sc.) 2007 Autumn – 2008 Spring
– Department of Applied Mathematics, ELU, Hungary,
– topic: Tensor Textures.

Kata Péter, Anikó Márton (M.Sc.) 2007 Autumn – 2008 Spring
– Department of Applied Mathematics, ELU, Hungary,
– topic: Temporal Independent Subspace Analysis of Facial Features.

Referent Professor

Nicolas Bonnet's internship (M.Sc.) Mar. – July, 2019
– École Polytechnique & HEC Paris, France,
– internship @ Atos (India),
– title: Vertical Integration of Supply and Delivery Chain from India to France.

Camille Jandot's internship (M.Sc.) Apr. – Sept., 2017
– Télécom ParisTech, France,
– title: Modelling Space Time Series with Operator-Valued Kernels
– Application to Detection of Epidemics.

Committee

Recruitment Committee

Data Science for Business (M.Sc., X-HEC) June 28, 2021
Data Science for Business (M.Sc., X-HEC) Apr. 1, 2020
Data Science for Business (M.Sc., X-HEC) May 27, 2019
Data Science for Business (M.Sc., X-HEC) Feb. 8, 2019
Data Science for Business (M.Sc., X-HEC) Nov. 21, 2018

Thesis Committee

Luigi Carratino (Ph.D.) 2020
– University of Genova, Computer Science and Systems Engineering Program; Italy,
– thesis title: Resource Efficient Large-Scale Machine Learning,
– role: External Thesis Reviewer.

Romain Brault (Ph.D.) 2017
– Télécom ParisTech; France,
– thesis title: Large-scale Operator-Valued Kernel Regression,
– role: Committee Member for Thesis defense.

Gábor Matuz (M.Sc.) 2010
– Budapest University of Technology and Economics; Hungary,
– thesis title: Adaptive Algorithms in Multiagent Environments,
– role: External Examiner for Thesis defense.

Kornél Kovács (Ph.D.) 2008
– University of Szeged; Hungary,
– thesis title: Various Kernel Methods with Applications,

– role: External Examiner for Thesis defense.

Internship Committee

X-HEC (M.Sc.) — Sept. 10, 2018
– École Polytechnique, France

Statistical Models in Biology and Physics (M.Sc.) — Mar. 22, 2018
– École Polytechnique, France

Data Science (M.Sc.) — Sept. 27, 2017
– École Polytechnique (morning) & Télécom ParisTech (afternoon), France

Data Science (M.Sc.) — Sept. 4–5, 2017
– École Polytechnique, France

Grants

Europlace Institute of Finance (EIF) — 2020–2021
topic: Machine Learning for Risk Management: Kernels with Shape Constraints
joint work with Prof. Dino Sejdinovic (University of Oxford) and
Olivier Derollez (BNP Paribas)
amount: 10,000 EUR

Labex DigiCosme — 2017–2018
keywords: operator-valued kernels, prediction of function-valued functions
joint work with Prof. Florence d'Alché-Buc (Télécom Paris) and
Prof. Arthur Tenenhaus (CentraleSupélec)
amount: 50,000 EUR

Academic Awards and Research Scholarships

Best Paper Award at NeurIPS (awarded to 3 papers out of the 3240 submissions)	2017
Research Scholarship of the John von Neumann Computer Society	2005–2012
Bronze Medal of the Pro Patria et Scientia Award of Hungarian Ph.D. Students	2008
Scientist of the Year Award of the School of Computer Science	2007
Research Scholarship of the Bliss Foundation	2004
Outstanding Student Award of the Faculty of Natural Sciences	2003
Research Scholarship of the Eötvös Loránd University	2003
National Scientific Student Competition and Conference (2nd prize)	2002

Interview

Memory (film; topic: AI & Brain)	Dec., 2018
At TWiML & AI on our work winning best paper award at NIPS-2017	Dec., 2017

Languages

- English (fluent), Spanish (basic), Hungarian (native).
- Programming languages: Python, Matlab/Octave, Maple, LaTeX, HTML.
